1. Cylinder Block and Head

The engine features a sturdy cast iron cylinder block designed to withstand high compression ratios and operational stresses. The cylinder head incorporates multiple valves per cylinder (usually two intake and two exhaust valves), facilitating efficient airflow and combustion.

2. Fuel System

This engine is equipped with a common rail direct fuel injection system, which provides precise control of fuel delivery. Key components include:

- High-pressure fuel pump
- Common rail accumulator
- Electromagnetic injectors

This system ensures better fuel atomization, improved combustion efficiency, and lower emissions.
