this book describes the struggle to introduce a mechanism that enables next generation information systems to maintain themselves our generation observed the birth and growth of information systems and the internet in particular surprisingly information systems are quite different from conventional energy material intensive artificial systems and rather resemble biological systems information intensive systems many artificial systems are designed based on newtonian physics assuming that every element obeys simple and static rules however the experience of the internet suggests a different way of designing where growth cannot be controlled but self organized with autonomous and selfish agents this book suggests using game theory a mechanism design in particular for designing next generation information systems which will be self organized by collective acts with autonomous components the challenge of mapping a probability to time appears repeatedly in many forms throughout this book the book contains interdisciplinary research encompassing game theory complex systems reliability theory and particle physics all devoted to its central theme what happens if systems self repair themselves

for nearly 20 years slauson cooper has been the book of choice in general veterinary pathology now totally revised and updated this new third edition continues to focus on recent advances in the understanding of the complex mechanisms by which mammals become sick it introduces readers to disease concepts inherent in clinical medicine through the study of pathogenetic mechanisms and stresses the importance of critical thinking throughout still the only text devoted to general veterinary pathology mechanisms of disease 3rd edition strikes a good balance between the detail required for sophisticated explanations of disease mechanisms and information overload
