natural and human induced changes in earth s interior land surface biosphere atmosphere
and oceans affect all aspects of life understanding these changes requires a range of
observations acquired from land sea air and space based platforms to assist nasa noaa and
usgs in developing these tools the nrc was asked to carry out a decadal strategy survey of
earth science and applications from space that would develop the key scientific questions on
which to focus earth and environmental observations in the period 2005 2015 and beyond
and present a prioritized list of space programs missions and supporting activities to address
these questions this report presents a vision for the earth science program an analysis of the
existing earth observing system and recommendations to help restore its capabilities an
assessment of and recommendations for new observations and missions for the next decade
an examination of and recommendations for effective application of those observations and

an analysis of how best to sustain that observation and applications system
